

QUATRO EXTERIOR SHADES

Year Round Outdoor Living

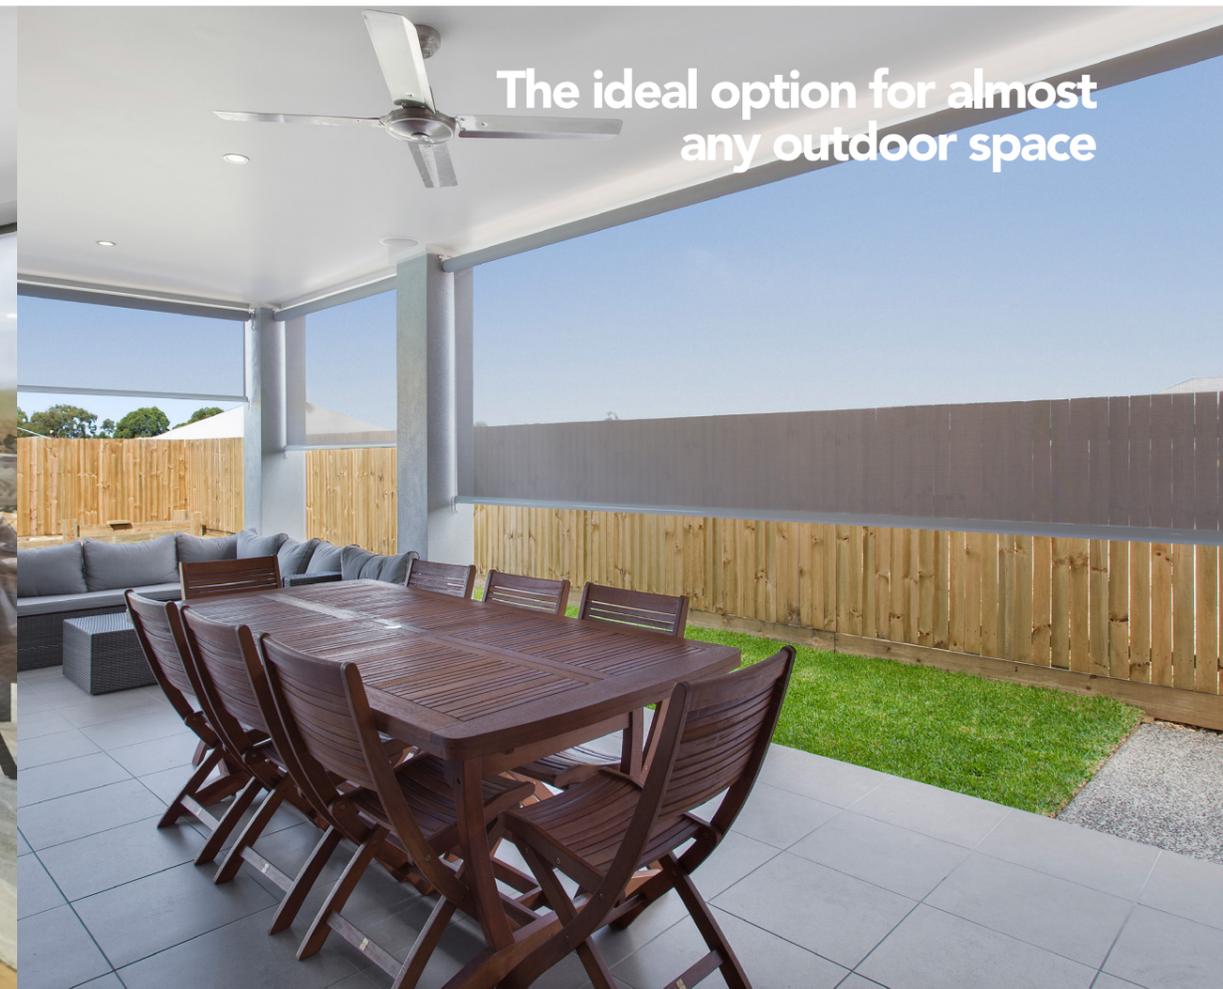

ENTERTAIN WITH COMFORT & STYLE

Create the all-weather entertaining space you've dreamed of
Quatro Exterior Shades allow you to enjoy your outdoors all-year round. Specifically designed for New Zealand homes, this premium range is practical, stylish and fully adjustable – so you can enjoy alfresco entertaining no matter the weather!

SIDE RETENTION SYSTEM

The ideal option for almost any outdoor space

STRAIGHT DROP ROLLER SHADES

QUATRO EXTERIOR SHADES COLLECTION

Designed and manufactured specifically for New Zealand homes, our Quatro Collection provides you with privacy, shade and shelter – so you can enjoy outdoor entertaining no matter the weather. With three stylish models available for residential and commercial use, plus the option of motorisation, you'll find the perfect choice for your lifestyle.

1

Quatro Side Retention System (SRS)

Our Side Retention System (or SRS) is the most innovative product in the Quatro Collection. With two elegant side channels, and a hidden zip fastening, you'll enjoy unmatched privacy, protection, and shade while outdoors. As a fully enclosed system, this model is ideal for any exterior up to a maximum of 5,300mm width x 3,000mm drop (or 15 sqm) in size. With no messy edges or gaps of sunlight to worry about, you can even enjoy complete protection from any pesky insects. It's as simple as lowering your shades.

That unique Side Retention System makes it quick and easy to adjust your shades as the weather changes. The high-quality fabric lets you continue to enjoy your views, while the two fabric screen openings makes it easy to control how much sunlight you let into your home.

Maintaining the Side Retention System is incredibly simple, making it family-friendly and perfect for busy lifestyles. With a manual gearbox and spring, along with a motorised remote operation option, the SRS is effortless to open and lower.

2

Quatro Wire Guide

Quatro Wire Guide Roller Shades are ideal for large, free-standing spaces – such as an open plan area in a lawn or park. These roller shades feature two unique stainless-steel wire rail guides (one on each side of the blind) to create a sleek finish and smooth operation. On windier days, the steel guides remain taut and firm, preventing your blinds from being blown around. Water resistant, this model is perfect for coastal locations.

For larger spaces, a series of Wire Guide Roller Shades can be installed with stunning results. With a maximum size of 5,300mm width x 3,000mm drop, you can also create a custom look from our range of stylish fabrics and complementary colours.

Much like our SRS option, the Wire Guide Roller Shades have an easy-to-adjust manual gearbox (using a crank handle) and the option of motorisation. The handle position can easily be adjusted to each user and can be detached, when not in use, to provide a perfectly clean-lined look.

3

Quatro Straight Drop/Drop-Down

Wanting something simple yet stunning? You'll find it with our Straight Drop Roller Shades – our most versatile outdoor blind in the Quatro Collection. Featuring a maximum 5,300mm width x 3,000mm drop, these blinds will fit almost any exterior space. Compact and tidy, the clever design allows your shades to be fully retracted out of sight when not in use. If the weather gets a little wild, or you need to avoid the sun, you can create a beautiful shaded hideaway with ease.

With an optional cassette, UV filtering, and coastal weather protection, the Straight Drop Roller Shades are lovely to look at and built to last. These shades can be manually and remotely operated, so you can decide what works best at your place. Prefer a manual operation? A crank handle lets you easily adjust the height of your shades. We've made the handle detachable so the focus stays on your blinds, and not their hardware!

4

Quatro Motorisation

Motorising your outdoor blinds provides the ultimate in convenience and style – and it's the ideal choice for all three of our Quatro models. At the touch of a button, you can instantly transform your outdoor living space into a shaded, secluded getaway. Or, open your shades to reveal a bright outdoor area brimming with natural light.

Our motors are durable and tuck discreetly out of sight within the top tube. As a hard-wired motor, you can be assured of easy maintenance. In fact, the motor will remain powered for the rest of its life. All the motors installed for the Quatro Exterior Shades Collection come with a 7-year warranty.

FABRIC OPTIONS

Images representative only

The Dayscreen outdoor fabric collection provides more than just good looks. By using innovative 'sunscreen' fabric, you and your family can be protected from harsh UV rays.

- High quality, strength and durability – the entire range carries a 10-year warranty as a testament to our fabric quality.
- Greenguard Gold certified to meet strict chemical emission limits – helping you achieve a healthier home.
- Stringent testing – including passing the Fire Retardant Test to AS1530 Part II & III standards, as well as achieving the UV Resistant ISO standard 105:B04
- Available in 5% and 1% openness factors, so you can select your ideal fabric transparency:
 - o 5% available in 18 contemporary colours
 - o 1% available in 7 popular colours marked with (*)

Custom Colours

- Selected custom colours are available. Please contact us for colour options and POA.
- Please note posts are not available in our standard 6-colour range. Refer to our custom colour options.

MAXIMUM DIMENSIONS:

Available for spaces up to 5,300mm wide and 3,000mm high, Quatro Exterior Shades are the perfect solution for most outdoor spaces. For shades wider than 4,000mm, we recommend installing two shades, and we use railroaded fabric over 3,000mm wide, to ensure optimum functionality and ease of use.

OPERATING SYSTEMS

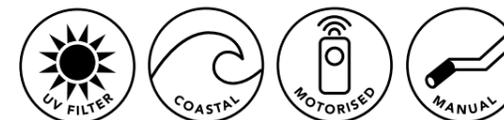

Crank handle – Allows you to manually operate the Wire Guide and Straight Drop roller shades with ease.

Spring Assist – Ensures the Quatro SRS can be manually adjusted to the preferred height and locked off using the secure locking system.

Motorised – Provides you with the ease of access and comfort of controlling your outdoor blinds using a remote. Our motor range includes the trusted 10 Nm and 30 Nm Alpha tubular motors. These are operated by a single, five or eight-channel remote control.

KEY FEATURES

STANDARD SHADES

SRS SHADES ALSO FEATURE

PRODUCT WARRANTY

Founded in 2009, Aspect Blinds and Shutters has built a reputation for superb product quality, craftsmanship and customer service. All Quatro Exterior Shades Collection come with up to a 10-year warranty. All the motors installed for the Quatro Exterior Shades Collection also offer a 7-year warranty. Our additional warranties include:

Dayscreen Fabric	10 years
Components	5 years
Alpha Motors & Remotes	7 years
Workmanship	3 years

CARE INSTRUCTIONS:

- Please refer to the full care and maintenance guide before operating your blinds.
- The shades should be fully retracted during high winds, stormy conditions or extreme weather events to avoid any damage.
- Always allow the shade fabric to fully dry before retracting.
- Ensure that the bottom rail locks or stainless steel locking clips are engaged to prevent your shades moving in the wind.
